

Horry County Schools (HCS) COVID-19 Cases Among Students and Employees by School*

The chart shown below in Figure 1 depicts a summary of COVID-19 cases among HCS students and HCS employees.

According to the South Carolina Department of Health and Environmental Control (SCDHEC), counts are based on individuals who attended school or school-sponsored activities during their infectious period. Total cases for a school are only shown if the cases for students and cases for staff are both at least five. School districts may cross-county boundaries and may not reflect county totals. Data are provisional and subject to change.

The less than five cases (Cases < 5) means that any change in cases from one to four is not shown as 1, 2, 3, or 4; rather, it is noted as less than five. However, because SCDHEC does list zero for no cases, the less than five equates to from one through four or (0 < Cases < 5) as shown in the column chart.

The cumulative total number of cases represents the number of cases to date, including the past 30 days count. For example, if the cumulative count were two cases and the 30 days rolling increase were two, the cumulative count would still show 2 + 2 = 4; hence, the count would be shown as less than five or (Cases < 5), and the past 30 days count would still be shown as less than five or (Cases < 5). On the other hand, if the cumulative count were to show four, which is less than five (< 5), and the 30 days increase by three (3), then the cumulative will equal seven (4 + 3 = 7); therefore, the cumulative will be shown as the following: cumulative = 7 and the 30 days rolling average would be shown as less than five or (Cases < 5). Please keep in mind that the 30 days rolling average is included in the cumulative. However, if the cumulative is from one to four, it will be shown with the inequality symbol of < 5 in the chart below, Table 1 (Page 2), and the SCDHEC website.

Percentage distribution of the number of schools with COVID-19 cases among students and employees—As of January 3, 2021

*SCDHEC provides this school report that includes, for every school, both cumulative and rolling 30-day counts of cases among students, teachers and faculty members who physically attend school on a regular basis. The SCDHEC report is updated Tuesday and Friday afternoons.
